CALCULATING FAMILY EXPENSES USING SERVICENOW

Aim Of the Project:

The aim Of this project is to develop a centralized and automated platform that helps individuals or families track, manage, and opti mize their expenses efficiently using the ServiceN0w platform .Th1S system focuses on simplifying financial planning by providing accurate expense categorization, reporting, and analysis. By leveraging ServiceN0w workflows and automation, the project enables users to monitor daily, monthly, and yearly expenses, thereby improving financial discipline and decision-making within families.

Milestone — 1

Setting up ServieeNow Instance

- Sign up for a developer account on the ServiceNow Developer site (https://developer_servicenow.com)_
- Log in to the ServiceN0w Developer Portal using registered credentials.
- Request a new Personal Developer Instance.
- Fill in the required details and submit the request,
- Receive instance details via email once the instance is ready.
- Log in to the ServiceN0w instance using the provided URL and credentials. • Explore the ServiceNow interface and basic navigation.
